**Employment Laws and Labor Practices That Support
Sworn to Honor (S2H): The Second Generation
of Police Management**

On-line Live podcast: 1:30pm- 3:00 p.m. EST
April 8, 2024 EST (Gratis)

Prepare to have your perspectives challenged and your paradigms shifted! Dr. D. J. Van Meter, a pacesetter in the field, is set to explain his revolutionary research that could redefine the landscape of police management as we know it.

This is not just another presentation. It's an opportunity to delve into the heart of systemic issues and explore why:

- Attempts at police reform have consistently fallen short, failing to bring about meaningful change in police conduct and behavior. Could it be that our approach has been flawed all along?
- Traditional Progressive Discipline and Performance Evaluation systems, rather than being allies of management, have turned into their greatest adversaries, ironically becoming a boon for “problem-employees
- The S2H structure, when framed as an employment contract, emerges as the ultimate benchmark for all employment and retention decisions.

This is a clarion call to all those invested in the future of policing. Come, join us on this intellectual journey and be part of the change that Dr. Van Meter's research promises to usher in. Let's step into the future of police management, together!
